Solving Your Motion Control Challenges With Ingenuity

Evolution Motion Solutions is a leading engineering partner, systems integrator, and value-added distributor of advanced hydraulic, electromechanical, and pneumatic technologies.

For over 80 years, our innovative solutions have been built on a foundation of technical excellence and industry-leading components designed for factory automation, heavy industrial, and mobile/off-highway applications.

We may not manufacture our customers' systems and machines, but we do help them run more efficiently and reliably by optimizing production time and enhancing performance.

Factory Automation

Evolution Motion Solutions provides integrated engineering solutions, expertise, and resources for automation, controls, pneumatic, electrical, hydraulic, sensing, joining, dispensing, and lubrication applications. With over 80 years of unparalleled experience in industrial product application, Evolution is your expert engineering partner for system and subsystem integration and value-added distribution, from initial concept and product to development and support.

Heavy Industrial

Evolution Motion Solutions Heavy Industrial encompasses everything required to design, build, maintain, and optimize hydraulic systems. We provide a wide array of value-added services that include locally-performed certified repairs and industry-leading hands-on-training. With over 80 years of industry experience and technical expertise in hydraulics, electronics, drives, and controls, we inspire customers to do more than they ever thought possible.

Mobile/Off-Highway

Evolution Motion Solutions provides technical expertise and resources to supply integrated solutions for actuation, optimization, propulsion, and electrification technologies for mobile/off-highway applications. With unparalleled experience in mobile product application and value-added distribution, Evolution is your trusted engineering partner for system and subsystem integration, conceptualization, production, installation, and support.

One Team. Infinite Solutions.

Driven by a passion for innovative technology and conquering challenges, we develop solutions that keep our customers moving toward the future. From concept to completion, we provide exceptional customer service deeply rooted in our Commitment to Excellence.

- Solutions Based Engineering
- Design Engineering for Hydraulics, Pneumatics, Lubrication, & Mechanical Solutions
- Machine Control Design Experience
- Hardware & Software Design
- Concept & Process Engineering
- System Integration Solutions
- Subsystem Efficiency Solutions
- Modification of Machines to U.S. Standards & Specifications
- Quality Assurance According to ISO 9001:2008 & AS 9100:2016
- Designs & Capabilities According to U.S. & European Standards NFPA, UL, CE

Elements of Success

From our beginnings as a trusted resource for premier components, we have evolved into Evolution Motion Solutions, an engineering partner, systems integrator, and value-added distributor (ESV).

As the world's first ESV, we provide our customers with highly engineered solutions for motion control challenges. By leveraging our group members' diverse industry experience and product knowledge, we engineer technically superior solutions with sustainable value.

We function as an extension of your engineering team. By delivering tailored solutions that address your specific needs, whether product sizing, concept engineering, or training, we ensure success and innovation at every step.

- Factory Trained Service Technicians
- Dedicated Product Management
- Maximum Stocking Levels
- Integrated Systems
- Application Engineering
- Custom Products & Solutions
- 3D Modeling & FEA Analysis
- Advanced Product Training
- Product & Machine Expertise
- Research & Development
- Product Launch Support
- Safety Reviews
- Prototyping

Our engineering expertise extends to integrating new and legacy systems, optimizing them for improved performance, reliability, and longevity by delivering application assistance, product support, and turnkey solutions.

- Service Technicians
- Application Assistance
- Committed Inventory Program
- Configured Assemblies
- Product Sizing & Selection
- Integrated Products
- Concept Engineering
- Training

We go beyond traditional distribution by offering value-added services such as 24/7 support, product kitting, and inventory management. We provide high-quality components and solutions that meet your needs—every time.

- 24/7 Support
- Customer Service
- Inventory Management
- Configured Assemblies
- Product Kitting
- Product Support

Expert Conceptual Engineered Solutions

The Motioneers are a team of dedicated engineers who create custom conceptual engineering motion control solutions for industrial applications. Serving as an extension of your engineering team, the Motioneers collaboratively partner with you to learn and understand your application's requirements and specifications so they can create the most efficient system design solution. By partnering with the Motioneers, you gain a team of expert mechanical, electrical, and controls engineers who provide concept engineering solutions for many technologies, applications, and industries - at no additional cost.

Technologies

- Life Sciences
- Semiconductor

Automation

With comprehensive application experience in precision motion controls, including conveyor systems, linear motion technology, HMI, PLC, machine vision, and robots, Evolution is perfectly positioned with the knowledge, support, and resources needed to provide leading technology and solutions for industrial and factory automation, allowing us to help you maintain a competitive edge in the market.

Electronics, Drives, & Controls Products

Evolution Motion Solutions employs flexible design concepts for its controls systems, ranging from small, compact, all-in-one servo-drive systems to large modular systems to panel free technology. These products provide exceptional diagnostic capabilities, including Industry 4.0 solutions. Our safety product offering is the broadest in the industry, and it includes free intuitive software.

Fluid Power

With comprehensive expertise in the mechanical and hydraulic aspects of fluid power, Evolution's in-house engineering, manufacturing, and technical sales teams are well-equipped to provide the most efficient power transmission and control solutions. Our deep understanding of fluid power and extensive application experience enable us to customize and tailor solutions to meet every customer's unique needs.

System Solutions

Evolution provides a complete suite of services that includes concept development, design, engineering, building, and testing capabilities that allow us to create system solutions tailored to your application specifications. From versatile aluminum extrusion and autonomous mobile robots to custom control panels and conveyors, our system solutions meet the highest standards of innovation and quality, including AS 9100, IS 9001, and UL 508A.
