About Us

Evolution Motion Solutions is a fluid power and factory automation distributor that can supply components or design systems to meet your equipment specifications. Our extensive array features a mix of readily available and custom-crafted power units, mechanical assemblies, and automation solutions intricately designed to align with your distinct specifications. Backed by a formidable cadre of accomplished Engineers and Certified Fluid Power Specialists, our unwavering capability will exceed your expectations. Whether through meticulous component selection, expert repair services, or innovative design strategies, our primary objective remains steadfast: to elevate equipment performance and prolong its operational lifespan, thereby facilitating a seamless and efficient operational environment for your organization, both now and into the future.

Core Competencies

- Hydraulics
- Pneumatics
- Automation/Programming
- Linear Motion
- Electrical Controls
- Mechanical Assemblies
- Repairs

Corporate Data

Evolution Motion Solutions
13835 Senlac Drive
Farmers Branch, Texas 75234-8822

NAICS: 332911, 333922, 333923, 333995,
333996, 333998, 811310

Differentiators

- We have skilled and experienced system engineers who can provide complete custom solutions that meet our customers' unique needs.
- We are proud to be the only complete motion control solutions provider in the industry. We offer all technologies under one roof—hydraulics, pneumatics, and automation.
- We have service and repair capabilities that allow our expert technicians to restore systems and components to like-new condition and provide a warranty.
- We are authorized to repair and service Bosch Rexroth industrial hydraulic components.
- ISO 9001 Certified
- AS9100D Certified
- PSC 14, 17, 43, 48, 49
- NIST 800-171 Compliant

Past Performance

V2X Federal & Defense Services

- Brief description: Designed and engineered a hydraulic cylinder to be used on the USMC Amphibious Assault Recovery Vehicle
- Dollar value of project: \$620,000
- Period of performance: 4/1/2023 – Current

U.S. Army-2d Battalion, 7th U.S. Cavalry

- Brief description: Designed and built a battery charging container. The automatic battery charging container simultaneously charges 48 batteries, CSC certified with USAU number, hydrogen gas detection system, fire suppression system and air conditioner for charger cooling.
- Dollar value of project: \$117,000
- Period of performance: 6/1/2023

BAE Systems

- Brief Description: Designed and engineered a manifold to be used on the United States Army FMTV.
- Dollar Value of project: Over \$1.3M
- Period of performance: 1/2022 - Current

U.S. Air Force

- Brief description: Designed and built aerospace hydraulic carts that supply hydraulic fluid to air frames being assembled at Tinker Air Force Base.
- Dollar value of project: \$451,780
- Period of performance: 3/3/2021 – 2/28/2022
