IndraDrive Services

REPAIR, REMAN, AND RETROFIT

Whether your IndraDrive components are newly installed or reaching legacy status, Bosch Rexroth offers a full suite of services to keep your systems performing reliably, efficiently, and safely, backed by over 200 years of combined Rexroth product repair experience in the USA.

Services Benefits

- Increased machine availability
- Production reliability through planned downtime
- Reduction in lost production costs
- Predictable budget with fixed prices
- Safe, no emergency cases
- Extension of machine and product life
- Investment protection

Certifications

- ISO
- UL
- ATEX
- Soldering IPC-7711, IPC-A-610

What Sets Us Apart from Third-Party Repairs?

Backed by an extensive history and experience in servicing and repairing, Rexroth provides higher-quality repairs than third parties, preserving the original component integrity.

- Only original factory OEM parts
- Original factory-trained techs
- Original specifications
- Factory-certified testing/calibration
- Technical product updates for continuous product improvement
- Less than 1% of warranty claims on repairs
- Total cost of ownership advantage
- Failure history/fault trend analysis

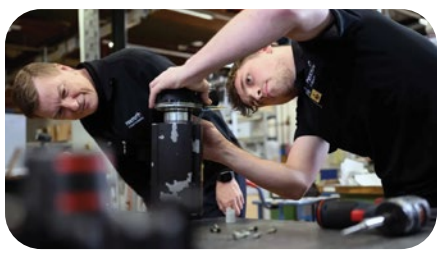
Repair

Our factory-authorized repair services restore your IndraDrive units to full function when issues arise. Each repair includes comprehensive diagnostics, cleaning, part replacement, firmware updates, and complete end-of-line testing. The repair report includes inspection, testing, the customer's stated problem, and potential failure analysis. Repairs are backed by a 12-month warranty and performed by certified Bosch Rexroth technicians using original components.

Reman Plus

Restore to like-new performance and save on replacement costs with Bosch Rexroth Reman Plus services. Your drive is disassembled, refurbished, and rebuilt to factory specifications, replacing all failed and worn components to like-new condition, correcting any problems, and updating to the latest technical revision. Reman Plus services provide a 2-year warranty, an extension of 5 years serviceability, and dedicated storage of repair materials, ensuring the repair of equipment beyond the end of service. Remanufacturing with Rexroth is a cost-effective, sustainable alternative to replacement that extends machine life.



Retrofit

When your IndraDrive units reach the end of their lifecycle, retrofitting provides a path forward. Bosch Rexroth helps you migrate to newer technologies with minimal design changes and maximum compatibility. We support you through every step, from product selection to on-site commissioning.
