

Sense+ Joysticks Stocking & Build Program

IN STOCK. SHIPPED FAST. COMPETITIVELY PRICED.

Enjoy easy and precise control of mobile machines with the Bosch Rexroth Sense+ Joystick, a robust, ergonomic, and multifunctional control grip. With unique vibration patterns or vibration frequency changes, this electronic joystick intuitively communicates key data such as proximity to a surface, virtual walls, mechanical end positions, or approaching obstacles. The tactile feedback feature can be tailored to different user preferences and application requirements, making the Sense+ Joystick a great fit for a wide range of hydraulic and electronic off-highway machines.

Evolution Motion Solutions now stocks and builds Sense+ Joysticks in-house with short build periods, quick deliveries—with a prototype in 3 to 4 weeks and production in 6 to 8 weeks for stocked components—and highly competitive pricing. For components not in stock, builds will take 16 weeks.

Easy Selection Guide for CUSTOM CONTROL
