

BALLUFF

Balluff I/O Plate Program: Simplifying I/O Integration

In today's fast-paced automation environment, integrators and OEMs can't afford the delays that come with sourcing, mounting, and wiring individual components. The Balluff I/O Plate Program eliminates that bottleneck with preassembled, ready-to-mount I/O plate configurations that make installation faster, cleaner, and easier to scale.

These durable metal plates include I/O modules, power supplies, and cables. They're available in various configurations depending on the application. These plates are available with multiple protocols, such as EtherNet/IP, PROFINET, and EtherCAT.

Built for Evolving Automation Processes

While the Balluff I/O Plate Program was developed with the automotive industry in mind, its versatility makes it valuable across a range of applications, including:

- Automotive production lines
- General manufacturing
- Robotic cells and integration panels
- Warehouse automation and packaging systems

20x18 Standard I/O Plate Configurations

1 EIP I/O AND POWER SUPPLY PLATE

SKU #: 2853756
(with mounting holes for additional I/O, CIP Safety or I/O Link Wireless Module)

1 EIP STD I/O AND POWER SUPPLY PLATE

SKU #: 2858204
(with mounting holes for additional I/O, CIP Safety or I/O Link Wireless Module)

2 EIP I/O AND POWER SUPPLY PLATE

SKU #: 2853757

2 EIP STD I/O AND POWER SUPPLY PLATE

SKU #: 2858206

CIP SAFETY, EIP I/O AND POWER SUPPLY PLATE

SKU #: 2853758

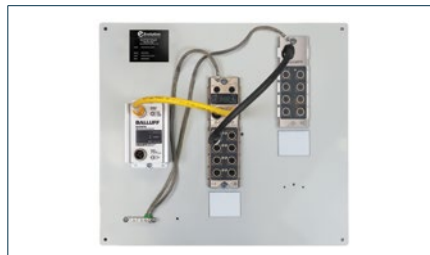

CIP SAFETY EIP STD I/O AND POWER SUPPLY PLATE

SKU #: 2858207

CIP SAFETY AND POWER SUPPLY PLATE

SKU #: 2858732

1 HUB I/O AND POWER SUPPLY PLATE

SKU #: 2864497

2 HUB I/O AND POWER SUPPLY PLATE

SKU #: 2864498

12x18 Small I/O Plate Configurations

1 EIP I/O AND POWER SM SUPPLY PLATE

SKU #: 2865129
(without mounting holes for additional I/O, CIP Safety or I/O Link Wireless Module)

2 HUB ONLY SM PLATE

SKU #: 2865130
(with mounting holes for additional I/O or PW)

1 HUB ONLY SM SUPPLY PLATE

SKU #: 2864499
(with mounting holes for master or 2nd hub)
